Uses of geothermal energy in food and agriculture

Did you know? The heat in the upper six miles of the earth's crust contains 50,000 times much as energy as found in all the world's oil and gas reserves combined.

Bookstore - World on the Edge: How to Prevent

Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers ...

Agriculture - Wikipedia

North Sea oil is a mixture of hydrocarbons, comprising liquid petroleum and natural gas, produced from petroleum reservoirs beneath the North Sea.. In the petroleum industry, the term "North Sea" often includes areas such as the Norwegian Sea and the area known as "West of Shetland", "the Atlantic Frontier" or "the Atlantic Margin" that is not geographically part of the North Sea.

LEAP: an online community for energy analysts working for sustainability and the home of the LEAP software system.

LEAP - energycommunity.org

Front Line Communities. Climate change imposes heavy burdens on those living nearest to floodplains, shorelines, and polluted city centers. By demanding cuts to dangerous pollution, providing access to green jobs, and spurring economic growth for all Americans, we can begin a fair transition to the economy of the future—one powered by clean and renewable energy.
