Second-generation programming language (2GL) is a generational way to categorize assembly languages.

Second-generation programming language - Wikipedia

Second harmonic generation (SHG, also called frequency doubling) is a nonlinear optical process in which two photons with the same frequency interact with a nonlinear material, are "combined", and generate a new photon with twice the energy of the initial photons (equivalently, twice the frequency and half the wavelength). It is a special case of sum-frequency generation.

Second-Generation Americans. A Portrait of the Adult Children of Immigrants. Chapter 1: Overview. Second-generation Americans—the 20 million adult U.S.-born children of immigrants—are substantially better off than immigrants themselves on key measures of socioeconomic attainment, according to a new Pew Research Center analysis of U.S. Census Bureau data.
