8 No. RECOMMENDATIONS Strength Quality of evidence 1. Clinically apparent seizures in the neonate should be treated if they last more than 3 minutes or are brief serial seizures.

Guidelines on Neonatal Seizures - apps.who.int

Epilepsy is a group of neurological disorders characterized by epileptic seizures. Epileptic seizures are episodes that can vary from brief and nearly undetectable periods to long periods of vigorous shaking. These episodes can result in physical injuries, including occasionally broken bones. In epilepsy, seizures tend to recur and, as a rule, have no immediate underlying cause.

Epilepsy - Wikipedia

Non-epileptic seizures are paroxysmal events that mimic an epileptic seizure but do not involve abnormal, rhythmic discharges of cortical neurons. They are caused by either physiological or psychological conditions. The latter is discussed more fully in psychogenic non-epileptic seizures
