Aphasia: Assessment

Psychological evaluation is defined as a way of assessing an individual's behavior, personality, cognitive abilities, and several other domains. The purpose behind many modern psychological evaluations is to try to pinpoint what is happening in someone's psychological life that may be inhibiting their ability to behave or feel in more appropriate or constructive ways; it is the mental ...

The dialogical self is a psychological concept which describes the mind's ability to imagine the different positions of participants in an internal dialogue, in close connection with external dialogue. The "dialogical self" is the central concept in the dialogical self theory (DST), as created and developed by the Dutch psychologist Hubert Hermans since the 1990s.
