

SELF RECONFIGURABLE ROBOTS AN INTRODUCTION

SELF RECONFIGURABLE ROBOTS AN PDF

ROBOT - WIKIPEDIA

SELF-REPLICATION - WIKIPEDIA

self reconfigurable robots an pdf

A robot is a machine—especially one programmable by a computer— capable of carrying out a complex series of actions automatically. Robots can be guided by an external control device or the control may be embedded within. Robots may be constructed to take on human form but most robots are machines designed to perform a task with no regard to how they look.

Robot - Wikipedia

Self-replication is any behavior of a dynamical system that yields construction of an identical copy of itself. Biological cells, given suitable environments, reproduce by cell division. During cell division, DNA is replicated and can be transmitted to offspring during reproduction. Biological viruses can replicate, but only by commandeering the reproductive machinery of cells through a process ...

Self-replication - Wikipedia

The research progress of swarm robotics is reviewed in details. The swarm robotics inspired from nature is a combination of swarm intelligence and robotics, which shows a great potential in several aspects.
